As an Informatics student and high-achieving researcher with a GPA of 4.0/4.0, I specialize in applying Machine Learning and Deep Learning to solve complex problems in healthcare, ecology, and robotics. With proven leadership experience as a Research Assistant and Team Lead on multiple research projects, I have developed end-to-end AI solutions. My expertise spans the entire lifecycle, from data gathering and annotation to designing model architectures, evaluating performance, and interpreting results to report valuable insights. I combine strong technical proficiency in Python and its machine learning libraries, such as PyTorch and TensorFlow, with a track record of effective team coordination and academic excellence to drive innovation through automated, data-driven systems.

Education

- Bachelor's Degree in Informatics | School of Computing | Telkom University | Expected Graduation: June 2027 | Current GPA: 4.0/4.0.
  May 2023 – Present
- Focused on STEM majors | SMA Negeri 2 Jember | Final Report Score: 90.37/100.
  June 2019 – May 2022

Assistant Lecturer

- Programming and Algorithms II | Bachelor of Informatics, International Class | Telkom University
  February 2025 – June 2025
  - Supported more than 40 undergraduate students during high-stakes programming assessments and quizzes.
  - Collaborated with course lecturers to test, review, and debug over 200 programming quiz questions, improving reliability and assessment quality.
- Calculus I | Bachelor of Informatics, Regular Class | Telkom University
  September 2024 – January 2025
  - Assisted over 40 students with problem-solving and conceptual understanding in calculus topics.
  - Evaluated and graded four major assignments, ensuring accuracy, consistency, and timely feedback.

Organization / Laboratory

- Staff | Study Group Coordinator | AI Lab | Telkom University
  June 2025 – Present
  - Led and coordinated weekly AI study sessions for 29 students, focusing on core Machine Learning and Deep Learning concepts.
  - Spearheaded recruitment efforts, managing and screening over 70 applicants to select high-potential candidates.
  - Supervise 15 project groups, providing technical mentorship and evaluation for final projects to ensure rigorous academic standards.
- Staff | Research and Development | IEEE Student Branch | Telkom University
  January 2025 – January 2026
  - Responsible for aiding in providing key information about competitions, including IEEE and BELMAWA competitions.
  - Participating in multiple competitions, such as YESIST12 – Maker Fair, being the leader of the team.
- Study Group Member | AI Lab | Telkom University
  October 2024 – March 2025
  - Engineered a Deep Learning model for plant disease classification using Computer Vision; served as Team Lead for the end-to-end development lifecycle.
  - Developed a comprehensive pipeline in Python for EDA, data preprocessing, model training, and evaluation, deployed via a Streamlit web application.
  - Gained technical proficiency in AI libraries (NumPy, Pandas, Scikit-learn, PyTorch/TensorFlow) across tabular, computer vision, and NLP datasets.

Industrial Projects

- Driver Behavior Analysis & Fatigue Detection System | In Collaboration with Bandung Techno Park & Trans Track
  March 2025 – Present
  - Engineered an end-to-end AI pipeline for a funded industrial project, processing over 50 hours of high-definition video data to detect fatigue and distracted behaviors.
  - Developed high-precision preprocessing workflows utilizing MediaPipe and Uniface to extract and interpolate 468 facial landmark coordinates per frame, ensuring robust tracking across varied environments.
  - Architected a Multi-Modal Fusion Model integrating spatial landmarks with cropped visual features, achieving an 11% increase in F1-score compared to the previous company models.
  - Implemented temporal smoothing and interpolation algorithms to stabilize landmark data, resulting in a real-time detection system suitable for industrial safety monitoring.

Research Assistant

- Deep Learning for Bird Identification Using Sound: Enhancing Avian Monitoring and Conservation in Indonesia and Malaysia | Research Assistant
  November 2024 – August 2025
  - Served as Research Team Lead, directing project strategy and task delegation using the SMART framework to ensure timely milestone delivery.
  - Architected a comprehensive deep learning pipeline, writing 4,500+ lines of Python code for audio signal preprocessing, feature extraction, and model training.
  - Selected as a Presenter at ICITACEE 2025, an international conference in Semarang, to showcase research findings on avian monitoring and conservation.
  - Authored academic manuscripts, synthesizing complex data from diverse research resources into formal publications.

- From Segmentation to Biomarker Quantification: A Deep Learning Framework for Metastases Detection in Bone Scans | Research Assistant
  August 2024 – February 2025
    - Appointed Lead Coder, developing a 3,000-line codebase to calculate confidence scores and validate predictions of existing machine learning models.
    - Engineered automated programs to compute the Bone Scan Index (BSI), directly enabling precise biomarker quantification for metastasis analysis.
    - Curated high-quality training data by meticulously annotating over 600 medical images, ensuring high accuracy for segmentation and detection models.

Committee

- Registration Committee | Bebras – Telkom University Bureau
  November 2025 – January 2026
    - Coordinated a four-member team to collect, clean, and prepare registration data for over 1,000 participants nationwide across Indonesia.
    - Utilized Microsoft Excel, Python scripts, and Google Workspace tools (Google Sheets and Google Drive) to manage data workflows efficiently and ensure accuracy.
- Paper Reviewer and Room Coordinator | International Conference of Information and Communication Technology (ICoICT)
  August 2024
    - Reviewed and provided feedback to four conference participants, ensuring their papers adhered to the required templates. Completed corrections ahead of schedule, earning appreciation for prompt and precise assistance.
    - Conducted device checks for four sessions to ensure smooth presentations and assisted 22 participants by preparing joint PowerPoint slides for seamless sessions.

Competition

- ADIKARA – Innovation Division – Scientific Article | Best Proposal | School of Computing Telkom University
  February 2025
    - Team leader, initiating planning, preparation, and execution of the project with the project title "Memanfaatkan Citra Lidah untuk Mendeteksi Diabetes Melitus Menggunakan Model MobileNET dan ViT"
- CCI Summit – Kaggle Competition | 3rd Place | CCI Telkom University
  October 2024
    - Team leader, Mentoring in Python and basic machine learning for tabular and text data.
    - Analyze, preprocess, and train multiple machine learning models for tabular data classification.

Language Proficiency

- Native Indonesian
- Proficient in English
    - English Communication Competence Test | Telkom University Language Center | Score: 3.75/4.0.
      February 2024
    - English Proficiency Test | Telkom University Language Center | Score: 577/677.
      August 2023

Skills and Interest

- **Programming Language:** Python, C++, and Go
- **Hobbies:** Research and Chess
- **Interest:** Machine vision in healthcare and bioacoustics or audio signal srocessing for acoustic analysis
- **Document Software:** LaTeX and Microsoft Office (Word, PowerPoint, Excel)

Hi, I'm

M. Rifqi Dzaky Azhad

AI/ML Researcher · Deep Learning Engineer

End-to-end deep learning research: medical imaging, bioacoustics, and safety-critical real-time systems.
