Studying informatics has formed my interests in the application of programming and machine learning to perform accurate, automated, effective, and efficient tasks. My involvement as a committee member in academic settings events and participating in organization activities have allowed me to improve my ability to work well in a group, as well as deepen my knowledge in my field. I have also been focused on my studies and aimed to increase my understanding and applying it to real-world problems. Additionally, I am striving to explore how my studies can contribute to different fields, like healthcare, robotics, and transportation.

Education

- Bachelor's Degree of Informatics | Telkom University | 3rd Semester | Current GPA: 4.0/4.0.
May 2023 – Present
- Focused on STEM majors | SMA Negeri 2 Jember | Final Report Score: 90.37/100.
June 2019 – May 2022

Assistant Research

- Bone Scan Image Segmentation | Research Assistant
August 2024 - Present
 - Developed code to calculate confidence scores for previous machine learning model results.
 - Wrote programs to compute Bone Scan Index (BSI) values for metastasis analysis.
 - Annotated over 600 image datasets to ensure accurate data labeling.

Organization / Laboratory

- Member | Central Computer Improvement (CCI), Data Research Division | Telkom University
December 2023 – August 2024
 - Acquired proficiency in Python and its key libraries (NumPy, pandas, seaborn, and scikit-learn). Completed several data visualization and analysis projects, including a final project on developing a sentiment detection model with 70% accuracy.
- Study Group Member | Artificial Intelligence Laboratory | Telkom University
October 2024 – Present
 - Learning the fundamentals of machine learning, including supervised and unsupervised learning for tabular, text, and image data.

Committee

- Paper Reviewer and Room Coordinator | International Conference of Information and Communication Technology (ICoICT)
August 2024
 - Reviewed and provided feedback to 4 conference participants, guiding them to align their papers with the required templates. Completed the corrections ahead of the deadline, earning appreciation from participants for the prompt and precise assistance.
 - Conducted device checks in the conference room for 4 sessions to ensure smooth presentations, assisted 22 participants by preparing joint PowerPoint slides to facilitate seamless sessions.
- Registration Committee Leader | Bebras Challenge by Telkom University
October 2023
 - Led the registration team by collaboratively directing the registration process for over 1.000 participants, ensuring smooth handling of all registrations. Participants were able to follow the event without any hindrance.
 - Used Microsoft Excel to manage registrant data and provide information requested by other committees and organizers.

Projects

- Amateur Research Paper: “Prediksi Kelulusan English Communication Competence Test (ECCT) Mahasiswa Telkom University Menggunakan Metode K-Nearest Neighbor (K-NN)”
April 2024
 - Gathered and analyzed data using a KNN model, achieving 80% accuracy. Contributed to writing the research paper with Microsoft Word and presented the project using Microsoft PowerPoint, effectively perform the presentation.

Language Proficiency

- Native Indonesian
 - Proficient in English
 - English Communication Competence Test | Telkom University Language Center | Score: 3.75/4.0.
February 2024
 - English Proficiency Test | Telkom University Language Center | Score: 577/677.
August 2023
-

Skills and Interest

- **Programming Language:** Go, python, and c++
- **Hobbies:** Video game, chess, and traveling
- **Interest:** Machine vision for healthcare, NLP, and predictive AI
- **Document Software:** Microsoft office (word, power point, excel) and LaTeX
