Studying Informatics has shaped my interest in applying programming and machine learning to develop accurate, automated, effective, and efficient solutions. My involvement as a committee member in academic events and participation in organizational activities have enhanced my teamwork skills and deepened my knowledge in my field. Becoming a research assistant on multiple papers, especially the leader of the team, allows be to think more critically and enhancing my leadership and soft skills. I have remained focused on my studies, aiming to deepen my understanding and apply my knowledge to real-world problems. Additionally, I strive to explore how my studies can contribute to various fields, including healthcare, ecology, and robotics.

Education

- Bachelor's Degree in Informatics | School of Computing | Telkom University | 4th Semester | Current GPA: 4.0/4.0.
May 2023 – Present
- Focused on STEM majors | SMA Negeri 2 Jember | Final Report Score: 90.37/100.
June 2019 – May 2022

Organization / Laboratory

- Research and Development Staff | IEEE Student Branch | Telkom University
January 2025 – Present
 - Responsible for aiding in providing key information about competitions, including IEEE and BELMAWA competitions.
 - Participating in multiple competitions, such as YESIST12 – Maker Fair, being the leader of the team.
- Study Group Member | Artificial Intelligence Laboratory | Telkom University
October 2024 – February 2025
 - Learning the fundamentals of machine learning, including supervised and unsupervised learning for tabular, text, and image data.
 - Leading a team project to develop a leaf disease classification system using machine vision and deep learning.

Competition

- ADIKARA – Innovation Division – Scientific Article | Best Proposal | School of Computing Telkom University
February 2025
 - Team leader, initiating planning, preparation, and execution of the project with the project title “Memanfaatkan Citra Lidah untuk Mendeteksi Diabetes Melitus Menggunakan Model MobileNET dan ViT”
- CCI Summit – Kaggle Competition | 3rd Place | CCI Telkom University
October 2024
 - Team leader, Mentoring in Python and basic machine learning for tabular and text data.
 - Analyze, preprocess, and train multiple machine learning models for tabular data classification.

Assistant Research

- Deep Learning for Bird Identification Using Sound: Enhancing Avian Monitoring and Conservation in Indonesia and Malaysia | Research Assistant
November 2024 – Present
 - Assistant Research Leader, assigning tasks, analyzing problems, and formulating strategies using the SMART approach.
 - Writing manuscripts, utilizing multiple research resources to gather information.
 - Wrote over 500 lines of code to develop the model architecture, analyze data, and perform preprocessing.
- From Segmentation to Biomarker Quantification: A Deep Learning Framework for Metastases Detection in Bone Scans | Research Assistant
August 2024 – February 2025
 - Assistant Research Lead Coder, wrote 1,000 lines of code to compute confidence scores for prior machine learning model results.
 - Developed programs to compute Bone Scan Index (BSI) values for metastasis analysis.
 - Annotated over 600 images to ensure accurate data labeling.

Committee

- Paper Reviewer and Room Coordinator | International Conference of Information and Communication Technology (ICoICT)
August 2024
 - Reviewed and provided feedback to four conference participants, ensuring their papers adhered to the required templates. sCompleted corrections ahead of schedule, earning appreciation for prompt and precise assistance.
 - Conducted device checks for four sessions to ensure smooth presentations and assisted 22 participants by preparing joint PowerPoint slides for seamless sessions.

Language Proficiency

- Native Indonesian
 - Proficient in English
 - English Communication Competence Test | Telkom University Language Center | Score: 3.75/4.0.
February 2024
 - English Proficiency Test | Telkom University Language Center | Score: 577/677.
August 2023
-

Skills and Interest

- Programming Language:** Python, C++, and Go
- Hobbies:** Video games and Chess
- Interest:** Machine vision in healthcare and sound-based machine vision for acoustic analysis
- Document Software:** LaTeX and Microsoft office (Word, PowerPoint, Excel)
